Studio Lombardi Associati is a Professional Consulting firm headquartered in the heart of Florence. The Studio has been founded in 1980 by its current Managing Partner Marco Lombardi, with the key mission to offer a vast range of best-in-class professional services to SMEs, providing solid and practical solutions to customers' needs in the taxation and administration areas.

Always approaching the professional consultancy from a business angle, the Studio has developed a strong know-how in both ordinary and extraordinary operations, establishing its areas of excellence in managing insolvency and turnaround situations, providing tax assistance to businesses and entrepreneurs' families and managing clients' ordinary administration. The Studio's team, now composed by the Managing Partner, 3 Partners, 4 Associates including a lawyer, 1 Industrial Engineer and a backoffice staff of 6 people, includes chartered accountants, experts in commercial law, tax law, company management and has access to a network of foreign business correspondents to be able to assist customers in an increasingly challenging business environment.

Recently the Studio has enlarged its well-known offering of traditional consultancy services to include an innovative initiative aimed to improve company performances or provide complete assistance in crisis situations: a new business practice focused on providing in-deep analysis of company business, building improvement and restructuring plans and with the ability of assisting companies with Temporary Management solutions.
