***Registered Tax Consultant***

**Your Vision and Mission become reality**

# ABOUT US

We provide, tax, consulting and financial service to public and private clients spanning multiple industries.

We do not make complex issues simple, but we make them understandable.

Good corporate governance is the heart of what we stand for. We recognize we should always be accountable for our actions and must maintain our independence and objectivity. We are committed to promoting and embracing constructive reform and to helping clients follow good business practices, while increasing value for their stakeholders.

We are a team of professionals experienced in the field of accounting service, system, taxation, and information technology that are ready to go out-of-the-way to provide maximum satisfaction to our clients, and put our best and sincere effort in rendering our services.

We believe that to guide our clients to success, simply showing them the way will not be enough. There is an old saying that says *“a good leader knows the way, shows the way, and goes the way.”* By continuously strengthening our team and enhancing our knowledge and skills we *“know the way”*. Lastly, by maintaining close relationship with our clients and their employees we get firsthand experience of their problems and concerns and therefore *“go the way”*. Therefore, to guide our clients to success we not only aim to become the light that shows the way, but also aim to become the bridge that delivers our clients to success. We aim not only to give the solution, but also aim to be the solution itself.

## Our Vision :

“To Become the Light and the Bridge for Our Client’s Successes.”

## Our Mission :

“To Give and Be the Best and Complete Solution for Our Client’s Audit, Accounting, System, and Taxation Needs.”

## OUR SERVICES :

We provide Tax and Advisory services, individually or on a combined basis, delivering globally consistent multi-disciplinary skills and capabilities, based on extensive industry knowledge, to all of our national and international clients.

We respond to our clients' complex business challenges with a global approach to services that spans industry sectors and national boundaries. Global capability and consistency are central to the way we work.

# TAX

Taxation is a critical component of all business operations, and the taxation system in Indonesia provides many unique challenges. Failure to comply with often unclear laws and regulations can lead to significant time commitments, professional fees and tax penalties. Progressive and bottom line focused management has realized that taxes (direct and indirect, domestic and international), must be viewed as a dynamic item of cost, rather than a passive charge on profits. Effective tax-cost management provides a distinct competitive advantage and requires the application of the appropriate tax strategies, proactively identified and surgically implemented.

An essential component in managing these costs is to retain business oriented professional advisors who understand tax governance, have specialized skills and deep industry knowledge, and can assist in developing and implementing tax strategies as well as systems to minimize tax risks.

Our approach to tax planning is multi-jurisdictional and encompasses the entire spectrum of direct, indirect and personal taxes. We, together with other member firm's spread across the globe, provide quality business oriented national and international tax advice.

Our experienced tax professionals are drawn from a wide number of countries and backgrounds. Industry specialization, service line expertise and international exposure, together with continual advanced training, equips them to work with our clients and be their

professional tax advisors in a wide spectrum of business matters.

# ADVISORY

Our broad range of Advisory Services consist of:

- Management Consulting
- Risk Consulting

## ***Management Consulting***

Improving business performance and making effective use of information technology are priorities that never go away. In fact, they go hand in hand because sustainable performance improvement depends on accurate and timely information to

drive performance related decisions, unwind complexity, create structural change and provide a solid organizational foundation. All of which require a strategic, effective deployment of IT investments. As a result, today's organizations continue to seek a greater connection and alignment among strategy, process and technology. This connectivity is essential to addressing such priorities as creating the right cost structure, improving business intelligence and insight, integrating business operations and

managing risk. Our Management Consulting professionals combine specialized skills in finance, technology, operations, supply chain and human resources with strengths in IT strategy and planning, sourcing and shared services, business transformation enabled by technology, and business intelligence to help our clients on their key initiatives. We have a track record of success in helping clients through their critical business challenges, supported by the Firm's deep industry knowledge and experience, the breadth of our Advisory services, access to Audit and Tax resources and the global footprint of our member firms.

Our services include:

### **Business Performance Services:**

- Strategy and business planning
- Managing large-scale transformation
- Change management
- Revenue assurance
- Sourcing Advisory

### **IT Advisory Services:**

- IT strategy and performance
- IT project advisory
- ERP, consolidation and business intelligent advisory
- Information protection & business resilience

# Risk Consulting

As the business and regulatory environment continues to evolve, organizations face unprecedented regulatory scrutiny and emerging and systemic risks that can challenge traditional strategies and assumptions. For business leaders, this means balancing the pursuit of corporate performance objectives, while maintaining compliance with regulatory requirements. As a result, many organizations are seeking answers that will help them align corporate strategy and culture to protect financial and reputational assets, as well as enhance business value. They recognize that, in both the short and long term, successful companies will be those that can manage risk, drive business performance and achieve regulatory compliance in an environment in which these outcomes must be managed strategically and with agility. Our Risk Consulting partners and professionals can help turn risk and compliance efforts into opportunities to drive sustainable business value. This begins with developing the right approach to risk - one that enables organizations to seize competitive advantage by:

- Improving risk intelligence and strengthening decision making and business strategy
- Driving business performance through convergence of risk and compliance processes and programs
- Increasing business value by transforming business models to be more risk adept

Our services include:

## **Enterprise Risk Management Financial Risk Management**

- Credit, operational, and liquidity risk measurement and management
- Economic capital management
- Capital adequacy and regulatory services
- Financial statement support

## **Internal Audit and Controls**

- Board advisory services
- Internal control implementation
- Internal audit outsourcing/co-sourcing
- Strategic performance review

## **Accounting Advisory Services**

- Improving the speed and quality of financial reporting
- Improving the financial reporting process
- Converting to International Financial Reporting Standards (IFRS)
